

# Stay Safe with Salt/Sand Shaker Bottles

Winter slips and falls are one of the leading causes of workplace injuries and a large contributor of workers' compensation costs.

## Help your team stay on their feet with salt/sand shakers!

- Fill and ship a salt/sand shaker to your work at home employees to help them keep their walkways free from ice this winter.
- Prepare shakers with salt or sand and place them in employee common areas for grabs.
- The perfect size to fit into a vehicle cup holder — encourage your team to keep a salt/sand shaker in their car for quick access.
- Provide a salt or sand station for employees to refill their shakers on a regular basis.

For more winter weather safety resources, contact your dedicated Loss Control Consultant or visit one of our WalkS.A.F.E. campaign pages.
